PROJECT PROPOSAL · FOR YOUR REVIEW

Online Product Catalogue for Tetra's OSSC Range

A fast, mobile-friendly website where your customers browse your water-treatment products and send you a quotation request over WhatsApp — matched to your existing Tetra brand.

Prepared for **Tetra Private Limited** Prepared by **Sajal** Date **18 Sep 2026** Version **v0.2**

01 What we're building, in plain terms

We'll create a clean, professional **online catalogue** for your 25 OSSC products — valves, filter media, treatment chemicals, UV and control components. Visitors can browse everything by category, open any product to see its details, and **request a quotation in a couple of taps — straight through WhatsApp**, with call and email as backups.

Because your catalogue quotes prices on request, **this is a catalogue-and-enquiry website — not an online shop with a cart or card payment.** It's built to bring you sales enquiries. If you later want to show prices and sell online, we've designed it so that can be added on top — without rebuilding.

02 What you'll get

Products by category
All 25 products organised into 5 easy categories, each with its own image and details.

Works on any device
Fast and clear on phones, tablets and desktops — most of your visitors will be on mobile.

Quote over WhatsApp
One tap opens a WhatsApp chat with your team, pre-filled with the product — with call and email as backups.

Search & filter
Visitors quickly find what they need as your product list grows over time.

Your Tetra branding
Same look, colours and feel as tetrabd.com, so it feels like a natural part of your brand.

03 What's included in this project

The scope we'll deliver for this phase. If you'd like to grow it later — for example showing prices or selling online — that can be added as a separate step on top of this.

- ✓ Catalogue of all 25 products, grouped into 5 categories
- ✓ A page for each product with image and key details
- ✓ "Request a quote" that opens WhatsApp, with call & email backups
- ✓ Search and category filtering
- ✓ Tetra-branded design, on its own web address
- ✓ Mobile-friendly and fast on every device

04 How we'll deliver it

We follow a clear, proven process — so quality stays high and you can review the work as it takes shape before it goes live.

1
Design & mock-up
Craft the look and page layouts for your approval before any coding.

2
Development
Build the approved design into a fast, working website.

3
Testing
Check everything across phones, tablets and desktops.

4
Review
Walk through it together and refine based on your feedback.

5
Deployment
Prepare and publish the finished site live.

05 What we need from you to begin

Please review and provide the items below. Having these ready lets us start smoothly and avoids delays once development begins. Items 1 and 2 are the most important — the rest can follow shortly after.

- [ ] **1 · Web address for the catalogue**
  Confirm the web address you'd like the catalogue to live at, and give us access to set it up — or connect us with whoever manages your domain and hosting. We're happy to recommend a suitable option once we know your preference.

- [ ] **2 · WhatsApp number for enquiries**
  As agreed, the "Request a quote" button will open a **WhatsApp chat** with your team, pre-filled with the product the customer is viewing — with call and email as backups.
  Please share: the WhatsApp business number to receive enquiries, plus a phone number and email address for the backup buttons.

- [ ] **3 · Brand assets**
  Your logo file (ideally SVG or high-resolution PNG). Your brand colours and fonts we've already matched from your existing website — we'll confirm them with you.

- [x] **4 · Product images — handled by us**
  As agreed, clean photos aren't being supplied, so **we'll extract and optimise the images from your existing product catalogue** and give them a consistent, professional look across the site. Please note the source images are limited in resolution; if higher-quality photos become available later, we can swap them in to sharpen the result. *Nothing needed from you here — noted for your awareness.*

- [ ] **5 · Product names & any details**
  Confirm the correct product names/spellings, and share any short descriptions or specifications you'd like shown. We can launch with names only and add detail over time.

- [ ] **6 · Who we coordinate with on technical matters**
  Please tell us the right person on your side for technical points — domain/hosting access, the WhatsApp number, and answering content questions — so we can move quickly without waiting.

Item 1 (the web address) and item 2 (the WhatsApp number) are what we need to make the site fully live — everything else can progress on a private preview link in the meantime.

06 Are we aligned?

This document simply reflects **how we've understood your requirements so far**, from your perspective — an online catalogue of your OSSC products where customers browse and send you enquiries over WhatsApp, matched to your Tetra brand.

Before we begin, we'd like to make sure we're on the same page. Please let us know:

- Does this match what you have in mind?
- Is anything missing, or anything you'd like added or changed?
- Are you comfortable with the scope and the way we'll deliver it?

Once you confirm we're aligned — and share the items in section 5 — we'll get started. Nothing here is fixed; we'll keep refining together as the project grows.
